linkedin.com/in/faseeh-sandhu    muhammadfaseeh.vercel.app

AI Engineer and Backend Developer with 2+ years of experience building production LLM applications and scalable backend services using Python, FastAPI, LangGraph, and vector databases. Currently working remotely with a Vienna-based engineering team; experienced delivering across healthcare, finance, and infrastructure domains.

## Education

**FAST National University of Computer & Emerging Sciences**

**Sep 2021 – Jun 2025**

*Bachelor of Science in Computer Science – CGPA: 3.71 (Dean's List, 8/8 Semesters)*

*Lahore, Punjab*

## Experience

**Valutico (via Redmath)**

**Jul 2025 – Present**

*Associate Software Engineer*

*Vienna, Austria (Remote)*

- Develop and maintain backend services and REST APIs in Python for financial valuation and analysis products used by 200+ advisory and audit firms
- Ship LLM-powered features for intelligent document processing and information extraction, cutting manual analysis time for valuation workflows by 70%
- Collaborate with a distributed European team across code reviews, feature development, and maintenance of Java-based services

**Digitalytics**

**Mar 2024 – Jun 2025**

*Full Stack Engineer (AI/ML)*

*Remote*

- Built an LLM platform for a U.S. health insurance company that extracts Problems, Barriers, and Tactics (PBT) from 100+ care-coordinator conversations using OpenAI APIs, vector embeddings, and semantic retrieval, achieving 80% extraction accuracy and reducing manual review time by 90%
- Developed an SDoH barrier prediction system enabling care teams to proactively flag at-risk members and intervene earlier
- Deployed an ML-based pipeline leak detection system covering two districts in Oman, automating leak identification across the water distribution network and accelerating detection and response

**Programmers Force**

**Aug 2024 – Dec 2024**

*Part-Time Associate Software Engineer*

*Lahore, Punjab*

- Built an AI-powered ClickUp chatbot with LangGraph enabling natural-language task creation and management, eliminating manual ticket entry for internal users
- Developed a text-to-SQL chatbot allowing non-technical staff to self-serve database queries in plain English, handling 100+ queries per week

## Projects

**Recruiter.AI** | LLaMA, FastAPI, React, PostgreSQL, WebSockets

[Live Demo](#)

- Built a real-time voice interview agent (WebSocket STT/TTS) that generates résumé-tailored questions with LLaMA and scores candidates automatically
- Implemented LLM résumé-to-job match scoring and browser-based AI proctoring with facial detection, shipped via recruiter and candidate portals for job management and scheduling

**FlowLeadz** | Next.js 15, PostgreSQL, Drizzle ORM, Better Auth, SSE

[Live Demo](#)

- Built a multi-role marketing-agency CRM (client, admin, and employee portals) with request-to-task triage, time logging, and real-time SSE notifications

**FitSync** | Django REST Framework, React, TypeScript, PostgreSQL

[Live Demo](#)

- Built a JWT-secured gym-management portal covering members, trainers, subscriptions, payments, and attendance, with a live analytics dashboard

## Technical Skills

**AI & Machine Learning:** LLMs, LangGraph, RAG, Vector Databases (Qdrant), OpenAI/Azure OpenAI, TensorFlow, PyTorch, Keras, OpenCV, NLTK, Scikit-learn, STT/TTS

**Programming Languages:** Python, SQL, JavaScript/TypeScript, C/C++

**Backend Development:** FastAPI, Django REST Framework, NodeJS, NestJS, REST APIs, WebSockets, SSE

**Cloud & Deployment:** AWS, Docker, Vercel, HuggingFace Spaces

**Databases:** PostgreSQL, MongoDB, SQL Server

**Frontend:** ReactJS, NextJS, HTML, CSS
